

450mm Road & Line Marking Cones

We offer two different road marking cones - both are a slim profile cone and they may be used to delineate and protect wet road markings but will not be compliant for any other use on the roads under CoPTTM.

- Dimpled feet to assist release
- Class 400 retro reflective grade cone collars
- Feet design to allow water to flow easily under the cone

Cone collars meet:
AS/NZS 1906.1 Class 400 retro reflective material requirements

Slim Composite Cone

Virgin PVC Upper with an injected Molded PVC flexible recycled base.

Dimpled Feet

One Piece PVC Cone

One Piece PVC Cone with Class 1 Retro reflective grade Cone Collar.

Dimpled Feet

Other 450mm Cones

No Stopping Cones

Generally used on local council roads to warn drivers that the area marked by these is a no parking or no stopping zone for a short period of time, whilst other work is being carried out.

Features:

- Slim Composite Profile
- Virgin PVC upper with an injected molded PVC flexible recycled base
- Dimpled feet to assist release
- Feet design to allow water to flow easily under the cone
- Recyclable material

 No Parking Cone also available

Plain PVC Cone

It has all the same features as our 450mm roadmarking cone above with the only difference being it has no retro reflective cone collar.

Ideal for non-highway i.e. private situations like car parks, schools, sports grounds, conferences, pedestrian walkways*.

* CoPTTM requirements do not apply in these situations so smaller cones may be used.

Fluorescent Orange Miniature 90mm Cones

Used for photographic evidence or forensic markers. Please note, minimum order quantities apply on this product.

Other colours available on request:

- Green
- White
- Yellow
