

RTL

RTL AWWMS

Advance Warning Variable Message Sign

Installation Package Option Available in Auckland

RTL's AWWMS is a compact, low profile design ideal for providing advance warning on high speed roads. It is fully compliant to NZTA Specifications and European Standard EN12966. The Mid Hinge Frame is stored in the folded position and raises up to 90° when in use. RTL AWWMS can be easily bolted onto the deck of a ute or trailer.

LED Advanced Warning Lights

Give advance warning to approaching road users. Compliant with EN12352:2006

LED Display Boards

Top & Bottom Boards with automatic and manual light adjustment.

Two AGM Batteries

Maintenance free batteries stored in a lockable box. Charge your AWWMS regularly for peak performance

230v Mains Charger

Utilise the 230v Mains Charger to charge the batteries after use

Wireless Touch Screen Controller

Pre-programmed with approved symbols that can be loaded at the touch of a button

In-Cab Toggle Switch

Raise and lower the board via the in-cab toggle switch

Galvanised Steel Frame

Designed and engineered in New Zealand for New Zealand conditions

Electronic lifting

Robust Lifting system with no hydraulic oil maintenance

Lockable Control & Battery Boxes

Provides security and protection from theft

Installation & preventative maintenance plans available.

Upgrades & Options

ADD + Installation Package

RTL can install and commission the AWWMS onto the deck of your Ute or Trailer and an ongoing preventative maintenance plan for regular servicing. See next page.
