

Cycling Infrastructure: Bike Repair Stands

Cycling is no longer just a pastime, it's now a truly legitimate, carbon zero mode of transport chosen by many. A well designed and supported cycleway needs the correct infrastructure behind it.

To encourage people onto bikes we need to ensure the experience is as convenient and easy as jumping in the car, by providing products and services that enhance the user experience. The RTL range of repair stands, outdoor pumps and accessories allow for bike repairs on the go without the need to carry cumbersome tool kits and spares.

With 1000's of units installed around the world the repair stands have withstood attempted vandalism and challenging climates to become a top performer.

This Deluxe Bike Repair Stands are a fully equipped bicycle repair station featuring tools securely attached to retractable cables to prevent tangling. They have all the regular tools for bike tuning, fixing common issues and bike maintenance. No need for riders to carry their own tools when out for a bike ride or commuting to work.

Our high-performance bike pumps are a perfect combination of ruggedness, durability and value and is a great solution for campus, city or other public heavy-use settings. The bike air pump with pressure gauge can stand up to the great outdoors. It is best when paired with a wheel chock and bike stand.

Our eBike Charging Stations are a public-use, universal eBike battery charging system that also provides a secure means of parking your bike. Designed to accommodate a wide range of personal eBike drive systems, each charging dock has a secure, user-accessible locker that contains a 240V outlet for power access. The chargers are designed to be installed indoors or outdoors with overhead protection.

RTL are here to also support urban developments and transport initiatives to create more vibrant and liveable streets. Cycleway Wayfinding Signs for Bike Lanes, and Delineators for Streets for People, Innovating Streets pilot and tactical urbanism programmes by Waka Kotahi.

If you do not find what you are looking for in our brochures and on our website - please contact the Sales Team on 0800 785 744 or sales@rtl.co.nz directly for any further assistance.
