

Twin Disc Flip Sign

Two cone mounted signs in one!

The Twin Disc Flip Sign has been designed to combine two cone mounted signs into one. Due to the hinged design the sign can be utilised as either a RG17.1 Keep Left Sign or a RG34.1 Keep Right Sign by simply lifting the sign off the cone and “flipping” it upside down and placing it back on the cone. This means the Twin Disc Flip Sign can easily be relocated from site to site without having to carry two signs.

The Twin Disc Flip Sign also features a web strap, manufactured from a flexible hard wearing material which allows it to fit on any 900mm PVC Cones including the RTL Slimline™ Cone, Slim Composite & Wide Profile Cone.

* **Two Signs in One**

* **Designed to fit over any 900mm Cone**

* **Proven Space Saver**

Side One:

Keep Left

MOTSAM:

RG-17.1

TCD Code:

RD6L

Side Two:

Keep Right

MOTSAM:

RG-34.1

TCD Code:

RD6R

Features and Benefits

- Space Saver as it combines two signs into one
- Lightweight and user friendly
- Designed to fit comfortably on any 900mm PVC Cone
- Narrow design - less than the base of the Cone
- Aluminium sign with hinged panel
- High Intensity Prismatic Reflective

TTM Applications

Please Note: Under temporary traffic management situations (CoPTTM) the Twin Disk Keep Right Sign is NOT a compliant device to the TCD rule and cannot be reduced from the standard L1 or L2 signs.

However, the cone mounted RD6L Twin Disk Keep Left Sign is an approved sign for TTM situations, used in instances where space does not allow for a full size sign, but must be shown/prescribed in the TMP and approved for use. For more Information, please refer to CoPTTM.
