

TraFFix Devices Folding Barricades

Enhancing Safety in Traffic Management & Work Zones

The Folding Barricades by Traffix Devices (TDI), represent an excellent choice for temporary traffic control and event management, providing the flexibility and reliability required in diverse settings. Their adaptability makes them ideal for various applications, including community events, school functions, triathlons, and marathons. Made from durable, impact resistant polyethylene, the barricades are 100% recyclable, lightweight and easy to handle. Have tested and passed MASH Tests 3-71 and 3-72.

* **Durable & Impact Resistant**

* **Highly Versatile & Visible**

* **100% Recyclable**

- **Impact resistant** blow molded polyethylene legs and panels provide maximum durability
- Panels are swappable, and **customisable** to health and safety, pedestrian directional or events etc.
- Dual upper and lower plastic panels for extra visibility (both 610mm wide x 200mm high)
- **Dual Direction** - High Intensity reflective Red / White Chevrons (one side left /// reverse side right \\\')
- The panel's edges are raised to protect the reflective sheeting during transportation and stacking
- Formed molded-in male and female stacking for compact stacking and secure transport
- Includes San-Fil Lower Panel that can hold up to 6.8kg of sand to eliminate messy sandbags and provides additional stability
- Modular design allows for easy replacement of components / parts – panels and legs etc

Ask for Custom Graphics on the Panels for Event Management, Facilities, Festivals and Expos.

A simple solution for enhancing safety

The ease of deployment and strong physical presence makes the Traffix Devices Folding Barricades an invaluable asset across various scenarios, from everyday traffic management to special events and emergency situations.
