

Pedestrian Safety Fences & Barricades

Our range of **New Zealand Made** Pedestrian Safety Fences are used for crowd control at events, festivals, expos and to restrict access at road works and construction sites. With two models to choose from, our Safety Fences are compact, durable, light weight and easy to use. For NZTA specifications, please refer to CoPTTM B6 Safety Fences & B7 Barricades.

d_Fence Safety Fences

D-fence are one of the most recognizable Safety Fences around. The Hinged option was developed for those smaller areas that need zoning off or require redirection - around man holes, on footpaths or even as a 'gate end'. Join two hinged units together and zone off a 1m x 1m section or use in-conjunction with the Standard Safety Fence.

Features:

- High corrosion, UV, and impact resistance
- High density polyethylene construction
- Light weight plastic swivel foot
- Overshoe available adding 25kg per foot
- Customer branding available
(Minimum order quantity applies)

Specifications:
