

Temporary Speed Hump

Quick to Deploy & Easy to Set up

Do you have a problem managing vehicle speeds through your work site? RTL has the Solution. RTL's Temporary Speed Hump is designed to help reduce speeds in Temporary Work zones, Emergency Situations and at Special Events. It is compact and lightweight meaning it can be easily moved to another site and re-deployed in seconds.

* Proactively Manage Speeds

* NZTA CoPTTM Compliant

* Quick to Deploy

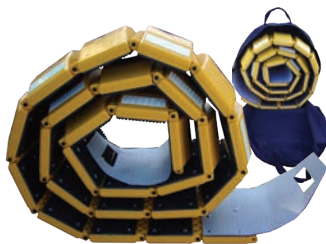

- NZTA CoPTTM Compliant to Section C.10.16
- Highly Visible, Bright Yellow
- Exceptional Retro-Reflective Strips
- Underside Black Rubber Grips
- Highly Portable & Lightweight
- Quick to Deploy & Easy to Set up
- Multiple speed humps can be positioned end-to-end to cover wider roads.

Note: Temporary Speed Humps must only be used at attended Work sites with Positive Traffic Control and a Temporary Speed Limit of 30km/h. Please visit NZTA for deployment practices. **MDFG100** Self Adhesive Sticky Pads are available to help reduce the movement of the temporary speed hump when deployed. Contact our team for more information.
