

Water Filled Barriers

Our range of *New Zealand Made* Barriers are made from tough, UV stabilised LDPE that is incredibly resistant to the elements, allowing them to provide a lifetime of service. Applications include construction sites, work sites, building sites, sports events, car-parks, cordoning off large areas and emergency situations.

Features:

- When empty, the Barriers can easily be moved into position by one person
- In-built hinge assembly allows for quick & easy connection with no risk of losing separate locking pins
- The tapered hinge design facilitates vertical undulations without a disruption of the barrier wall

Standard PortabARRIER

RTL Code: TB16 45

Note: Not crash rated to NCHRP 350

Features:

- Drainage bung
- Strong & robust
- Easy carry handles
- Easy stacking
- Optional branding available
