

Traffic Cone Recycling Policy

Returns Policy

RTL have a cone recycling policy that involves taking old road cones back. All we ask is that the old, used road cones meet the minimum acceptance criteria outlined below as they are then reprocessed into new recycled products via a shredding process. Customers only need to cover freight back to the depot. There is no additional fees or costs for recycling.

Process:

- Customer contacts RTL about cone recycling via our online form: **** ONLINE FORM COMING SOON ****
- These are assessed and must meet acceptance criteria below.
- RTL then sends you instructions and a PDF to attach to the cones
- Please be aware that any cones returned that do not meet the criteria will be charged at \$6.00 per cone / cone pieces or returned to the customer at their cost. **Please read the Acceptable Criteria below carefully.**

If you wish return old cones for recycling it's coming soon **** ONLINE FORM COMING SOON ****

Acceptance Criteria

Acceptable Cones:

Acceptable Cones:

- Cones are acceptable even if they have punctures and small areas of staining due to materials such as asphalt, cement slurry or dirt.
- Cones with the Upper broken away from the base are acceptable if they meet the above criteria and both pieces are returned and stacked together as one.
- Part Cones with the full upper part of the cone without the base are acceptable.

Unacceptable Cones:

Unacceptable Cones:

- If the cone has a large amount of bitumen (tar), chipseal or gravel covering them, they cannot be recycled.
- Broken bases or small broken parts of a cone by themselves are not acceptable.

If unacceptable cones are returned, then the customer will be charged at a rate of \$6.00 + gst per cone / per cone piece for the disposal of these as they cannot be recycled.
