New Zealand Agents for

SARIS
INFRASTRUCTURE

Dear

RTL are pleased to introduce our new range of Cycle Infrastructure Products.

Cycling is no longer just a pastime, it's now a truly legitimate, carbon zero mode of transport chosen by many. To encourage people onto bikes we need to ensure the experience is as convenient and easy as jumping in the car.

A well designed and supported cycleway needs the correct infrastructure behind it to give that value option to potential users. Partnering with Saris Industries we introduce a range of supporting products that are an essential part of a cycle network.

As cycle networks develop throughout the country, we need cater to the needs of cyclists by providing products and services that enhance the user experience. The RTL range of repair stands, outdoor pumps and accessories allow for bike repairs on the go without the need to carry cumbersome tool kits and spares.

With 1000's of units installed around the world the repair stands have withstood attempted vandalism and challenging climates to become a top performer.

Install along cycle routes, at the beginning or end of cycle trails or in high congregation areas like universities and shopping precincts.

If you do not find what you are looking for in our brochures and on our website - please contact the Sales Team on 0800 785 744 or sales@rtl.co.nz directly for any further assistance.

WHEEL CHOCK

A simple design for a simple function. The Wheel Chock holds a bicycle upright, so you can more easily inflate tires or make minor adjustments. Available in a floor mount and repair mount option to work wherever you need it. The stylish cut-outs on the sides of the Wheel Chock provide a visual indication of what it's for.

Product Details

- Supports bikes without kickstands while inflating tires
- Tire friction stops roll-back, upright position eliminates trip hazard
- Accommodates tires up to 2.75" and wheel diameters up to 29"
- Cannot lock bikes to the Wheel Chock
- ADA compliant

INDOOR PUMP

The High Security Indoor Pump is a perfect shared-use bike pump for inside installation. It is ideal for bike rooms and parking areas. A high quality, solid stainless steel piston rod, alloy handle and smash proof gauge cover provide maximum vandal resistance and durability. Heavy duty, cut-resistant hose and security fittings hold a replaceable pump head that handles both Presta and Schrader valves with ease.

26248 Shown

Product Details

- Solid stainless steel piston rod, alloy handle, and smash proof gauge cover provide maximum vandal resistance
- Hose with braided steel core provides protection against cutting
- Choice of two hose lengths (18" or 35")
- Universal pump head works with Presta and Schrader valves
- 2 year warranty

WAVE DELINEATOR

Protected bike lane, cycle track, Green Lane, low-stress bike lane- whatever your preferred nomenclature, cities in the U.S. have been implementing these on public streets at impressive rates. The Wave Delineator is ideal for temporary pop-up bike lanes when communities want to create a demonstration protected lane or direct bike traffic during day or week-long events.

Specifications

Model #	Type of Mount	Weight	Length	Width	Height
8700	Freestanding	11 lbs.	93.3"	5.4"	27.4"

WAVE DELINEATOR

Can a bike lane feel SAFE and FUN? If so, will it impact the success of a project and increase enjoyment?

In collaboration with Los Angeles DOT and Gensler Architects, Bike Fixation designed a temporary lane delineator that makes pop-up bike lanes fun and inspiring. Standard bollards, flex posts, and traffic cones make bike lanes feel like construction zones and unpleasant places to be.

The goal was to design a barrier that helps make demonstration projects and events more successful, thereby helping build community support for more permanent infrastructure.

Before:

After:

Product Details

- Aesthetic: wave design with double cut-out
- Easy Deployment: no tools required
- Transportable: lightweight and collapsible
- Robust: thickness optimized for weight and deflection
- Safe: chamfered edges, reflective decals, ADA compliant, optimized height for drivers and cyclists
- Multiple mounting options: freestanding, temporary, and semi-permanent
